**Subject:** Workshop on powerline communications - Call for contributions

RFID-PLC-Germany.do

c

Dear Mr. Brefort!

In reply to your call for contributions for the Workshop on powerline communications, the subcommittees NI-31.4 and NI-17.K of the German Institute for standardization (DIN) have asked me to forward to you the contribution which you find attached to this mail. While NI-31.4 deals with RFID in the context of Automatic Data Capture and Identification (German mirror committee to ISO/IEC JTC 1 SC 31 WG 4), NI-17.K is responsible for the German position with regards to Contactless Chipcards within the framework of Cards and Personal Identification (German mirror committee to ISO/IEC JTC 1 SC 17 WG 8)

With kind regards,

Yours sincerely

Nikolaus Kovács

(Secretary within DIN Committee Information Technology responsible for NI-17.K and NI-31.4)
