

EMI/RFI

Yearbook 2010

The EMC expert for every lab bench.

The R&S®ESL EMI test receiver – the first combination EMI receiver / spectrum analyzer in the lower price range

The R&S®ESL enables you to keep an eye on the EMC characteristics of your product development at all times – and thus on the costs of your design. It's the EMC specialist for every bench:

- EMC diagnostics with the functions of a compliance receiver and of an all-purpose spectrum analyzer
- Bandwidths and detectors to CISPR 16-1-1, including the latest CISPR-average and RMS-average detectors— unique in this price range
- Reproducible measurement results

Find out more about the EMC specialist for your bench at www.rohde-schwarz.com/ad/esl.

*Packages available
for every budget.

EMC Yearbook 2010

15th Edition

It's So Easy to Use

Pages 3 to 22 Product Finder. The major product categories are highlighted in black areas e.g. **Filters**
Each is subdivided into individual products. The company names in italics have advertisements.

Pages 23 to 33 Alphabetical listing of Companies.

Page 34 Distributor names and addresses, supplied by entrants in the yearbook.

Front Cover photograph by permission of Syfer Technology Ltd

Every effort has been made to ensure that the information given in this Yearbook is accurate, but no legal responsibility is accepted for any errors, omissions or misleading statements in that information caused by negligence or otherwise, and no responsibility is accepted in regard to the standing of any firms, companies or individuals mentioned or for any advice or information given by them.

If you wish to reproduce any of the information in this Yearbook please do not do so without first seeking the written permission of Nutwood UK Ltd.

Some great books available from Nutwood UK Ltd, see page 36

©Nutwood UK Ltd Published March 2010

The EMCIA was formed on 20th March 2002 for the benefit of companies involved in Supplying, Designing, Testing and Manufacturing EMC products. Networking lunches are held 3 times a year. The current President is Keith Armstrong CEng MIET MIEEE ACGI, Cherry Clough Consultants. The EMCIA Secretariat is Nutwood UK Ltd. To find out more go to page 35.

Würth Electronics

EMC & Inductive Solutions

Manufacturer of EMI ferrites, inductors, RF components and transformers

- 14,500 catalogue parts ex stock
- Reference designs with the manufacturer of switching regulator IC's
- Design kits with life time refill
- Samples free of charge, usually within 48 hours
- Small quantities: We can deliver upon request our technology leading components direct from stock to assist with pre production runs
- Worldwide technical sales force: We are present worldwide to support you in finding solutions
- Application guide „Trilogy of Magnetics”

EMC & Compliance Companies

3C Test Ltd
Silverstone Technology Park
Silverstone Circuit, Northants
NN12 8GX
Tel: +44 (0)1327 857500
Email: sales@3ctest.co.uk
Web: www.3ctest.co.uk

3C Test is a UKAS accredited EMC Test facility based at Silverstone Circuit in Northamptonshire, providing test facilities for commercial, IT, military, medical and automotive EMC testing.

Approved by UKAS, FCC, VCCI, AEMCLRP, Ford and a DTI appointed Notified Body for the assessment of Technical Construction Files (TCF's). 3C Test is appointed as a VCA Technical Service for the e marking of automotive sub-assemblies & full vehicles. The custom built Silverstone site houses 4 Semi-anechoic chambers, including a CISPR 16 / ANSI C63.4 compliant 10m chamber, a 3m CISPR 16 / ANSI C63.4 chamber and two CISPR 25 / ISO 11452 chambers. The facility also boasts a general-purpose screened room, two dedicated automotive transient (ISO 7637) laboratories and a high voltage mains immunity/ESD laboratory.

ACS Industries, Inc
UK Contact: Tim Dearnley
Ashgrove Barn, Broad Lane
Holmfirth, West Yorkshire
HD9 3JS
Tel: +44 (0)7845 940251
Email: tdearnley@acsind.com
Web: www.acsindustries.com

ACS Industries, Inc. is the world leader in engineered knitted wire mesh solutions. We offer cost effective EMI/RFI shielding products including knitted wire mesh cable, shielding tape and gaskets. The company is vertically integrated with in house wire drawing and is TS16949 certified.

A.C. Technology Systems Ltd
Popes Building, 1 Fore Street
East Looe, Cornwall PL13 1HH
Tel: +44 (0)1285 657756
Fax: +44 (0)1285 652362
Email: filipps@msn.com

A.C. Technology Systems Ltd specialises in the design, development and supply of modules and systems associated with the protection of equipment and structures from the effects of both radiated and conducted electromagnetic interference.

Advanced Monolithic Ceramics
Whispers, Station Approach
Four Marks, Hants GU34 5HN

Agilent Technologies UK Ltd
610 Wharfedale Road
Winnersh Triangle, Wokingham
Berks RG41 5TP
Tel: +44 (0)118 927 6201
Fax: +44 (0)118 927 6855
Email: contactcenter_uk@agilent.com
Web: www.agilent.com

Agilent Technologies provides the tools and solutions you need to overcome your EMC test challenges. Offering outstanding accuracy and full compliance with the CISPR 16-1-1 and MIL STD 461 standards, the introduction of the PSA-based EMI receiver enables engineers working with in-house EMC test labs, third-party EMC test houses and solution providers to increase the speed and confidence in pre-compliance, troubleshooting, and compliance measurements. Agilent has recently introduced the newest pre-compliance solution, based on the popular X-series of special analysers, combining limit lines and amplitude corrections with fully CISPR compliant detectors and bandwidths, outstanding speed and world-class usability to give the precompliance professional the edge in quickly assessing and solving precompliance problems. Whether you are faced with a legacy system nearing the end of its support life, or are looking for a more accurate, flexible and inexpensive solution to compliance testing, Agilent Technologies can now offer the solution.

Alrad Instruments Ltd
Turnpike Road Industrial Estate
Newbury, Berks RG14 2NS
Tel: +44 (0)1635 30345
Fax: +44 (0)1635 32630
Email: electronics@alrad.co.uk
Web: www.alrad.co.uk

ALRAD ELECTRONICS is one of the UK's foremost high voltage product distributors. We sell a very wide range of high stability, low ripple high voltage power supplies, high stability current monitors offering high accuracy of +1%, -0% and fast rise time and variable pulse width industrial pulse generators.

AQL EMC Ltd
16 Cobham Road, Ferndown

Advanced Test Solutions for EMC

Teseq for EMC Test Solutions: A New Brand Combining Tradition and Experience with Dynamic and Innovative Development.

Teseq is the new name of the Test Systems Division that belonged to the Swiss-based Schaffner Group until it became an independent company in the wake of a management buyout on November 27, 2006.

Teseq has retained all of the former Division's management and employees, and their status as direct stakeholders in the company will ensure intense commitment and a dynamic approach to development. The new company also continues to stand for customized client support, proven products and extensive know-how. The Company's focus on its core business – EMC test solutions – will be reinforced by a greater attention to innovation in the area of research and development. The streamlined size of the enterprise ensures maximum independence, agility and flexibility. Around the world, Teseq stands for reliability – the Company's management and employees look forward to proving this every day.

I. Thomas GmbH

The EMCIA was formed on 20th March 2002 for the benefit of companies involved in Supplying, Designing, Testing and Manufacturing EMC products. Networking lunches are held twice a year. The current President is Keith Armstrong CEng MIET MIEEE ACGI, Cherry Clough Consultants.

The EMCIA is led by an Executive team appointed from its members. Decisions that do not affect the constitution are made at this level, thereby ensuring actions can be introduced in an efficient manner. For a list of Executive Committee Members go to the website www.emcia.org.

If you are interested in joining and you would like to attend a meeting as a guest, just contact the Secretariat on emcia@emcia.org. The meetings are held twice a year.

The EMCIA Secretariat is Nutwood UK Ltd, publishers of The EMC Journal, www.theemcjournal.com.

The IET's new Guide on EMC for Functional Safety

Cost £27 plus p&p. ISBN 978-0-9555118-2-0

This book comprehensively describes a practical and cost-effective procedure to potentially help to save lives and reduce injuries where electronics technologies are used in all types of safety-implicated products, systems and installations.

The necessity of employing EMC expertise from the start of projects that have safety implications (instead of the usual approach of design/assembly with little attention to EMC, then fiddling around until EMC tests are passed) will help manufacturers

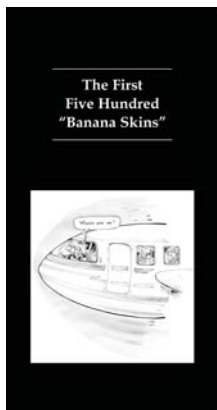

and other suppliers to get to market more quickly with lower overall manufacturing costs. Their customers also stand to benefit financially from higher reliability and less downtime.

Another benefit is that manufacturers and other suppliers will potentially be exposed to lower levels of financial risks, due to reduced levels of warranty returns and fewer product liability lawsuits (and will have better defences in case of such lawsuits).

Nutwood UK Limited is licensed to print and sell this book throughout the world.

The IET's new Guide on EMC for Functional Safety (August 2008) is also available as a 167 page PDF that can be downloaded for free at: <http://www.theiet.org/factfiles/emc/index.cfm>

The First Five Hundred Banana Skins

Cost: £10 plus p&p.

Banana Skin items briefly describe reports of electrical/ electromagnetic interference. Some are personal anecdotes, some come from research, and some are extracted from official documents and reports. Some of these interference incidents had harmless or even amusing results, some lost companies significant amounts of time and/or money, even to the point of bankruptcy, and some resulted (or could have resulted) in injury or death.

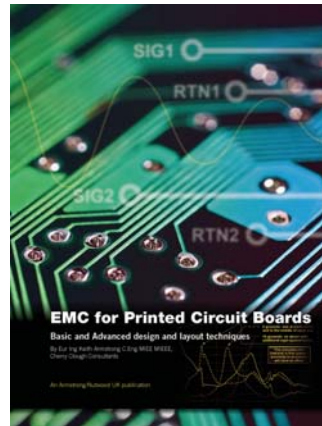

These anecdotes and reports could help you to identify interference problems that could happen to your designs, so that you deal with them in advance as part of the normal design/development procedure and don't have the embarrassment and cost of trying to correct poor EMC design after products have been shipped or systems installed.

These anecdotes and reports probably represent just the tip of a very large iceberg, with unguessable costs for manufacturers and society as a whole. As electronic technologies continue to advance, and as more (and more complex) software is used, interference problems can only get worse. Don't slip up. Buy your own copy of Banana Skins.

Compiled by Keith Armstrong on behalf of The EMC Journal and published by Nutwood UK Ltd.

EMC for Printed Circuit Boards Author: Keith Armstrong C.Eng MIEE MIEEE ACGI BSc (Hons)

Cost £47.00 plus p&p. ISBN 978-0-9555118-0-6 (Wiro)
ISBN 978-0-9555118-1-3 (Perfect Bound)

More than just a book. It is a true learning aid. Graphics in full colour. Designed to lay flat for easy learning. Written in a clear concise no nonsense style. Destined to become the Standard for EMC PCB Design. 168 A4 pages.

This book is about good-practice EMC design techniques for printed circuit board (PCB) design and layout. It is intended for the designers of any electronic circuits that are to be constructed on PCBs, and of course for the

PCB designers themselves. All applications areas are covered, from household appliances, commercial and industrial equipment, through automotive to aerospace and military.

This is a book for electronic and PCB engineers who need to employ good EMC and SI techniques to save time and money when designing with the latest technologies, to make reliable and compliant products.

The book uses very little maths and does not go into great detail about *why* these techniques work. But they are well-proven in practice by successful designers world-wide, and the reasons they work are understood by academics, so they can be used with confidence. Numerous references lead to detailed explanations and mathematical foundations.

It is difficult for textbooks to keep up to date with fast-changing PCB technology and EMC techniques, which is why most of the references are recent conference papers and articles available via the Internet.

EMC for Product Designers Fourth Edition Author: Tim Williams

Cost £41.00 plus p&p. ISBN 978-0-75-068170-4

This book is almost certainly regarded as the bible on EMC Design across all International borders.

Brilliantly written and extremely informative, it is divided into three parts, Legislation & Standards, Testing and Design plus a number of interesting and useful Appendices.

Every EMC product designer should buy this latest edition.

Advanced Technology – It's in our Genes

CST STUDIO SUITE 2010 for EMC/EMI analysis

Next generation 3D electromagnetic simulation

The best available tool for EM simulation has evolved into version 2010. With a user friendly interface, easy data exchange to and from other software tools, a choice of first class solvers and world class post-processing tools, you can leverage the latest developments in 3D electromagnetics to bring designs to market faster and with lower risk.

Choose CST STUDIO SUITE 2010 – complete technology for 3D EM.
