

EMC

Yearbook 2013

Best in EMC testing: More speed. More insight. More intelligence.

More than
40 years of EMC
T&M experience

The R&S®ESR is the new test receiver for standard-compliant EMC testing.

▮ **Save time**

The R&S®ESR time domain scan makes EMC measurements faster than ever before, allowing you to dedicate more time to your main mission.

▮ **Find everything**

The realtime spectrogram and the persistence mode seamlessly display the spectrum so you can detect and analyze sporadic or hidden emissions and their cause.

▮ **Work flexibly**

The R&S®ESR combines a test receiver and full-featured spectrum analyzer in a single instrument, giving you all the tools you need for your measurement task.

▮ **Simplify measurements**

The R&S®ESR combines functionality with clear structure for easy navigation on the convenient touchscreen.

EMC Yearbook 2013

18th Edition

It's So Easy to Use

Pages 2 to 24 Product Finder. The major product categories are highlighted in black areas e.g. **Filters**
Each is subdivided into individual products. The company names in italics have advertisements.

Pages 25 to 35 Alphabetical listing of Companies.

Pages 36 & 37 Distributor names and addresses, supplied by entrants in the yearbook.

Front Cover photograph by permission of Rohde & Schwarz UK Ltd., see page 32

Every effort has been made to ensure that the information given in this Yearbook is accurate, but no legal responsibility is accepted for any errors, omissions or misleading statements in that information caused by negligence or otherwise, and no responsibility is accepted in regard to the standing of any firms, companies or individuals mentioned or for any advice or information given by them.

If you wish to reproduce any of the information in this Yearbook please do not do so without first seeking the written permission of Nutwood UK Ltd.

Some great books available from Nutwood UK Ltd, see page 39

©Nutwood UK Ltd Published March 2013

The EMCIA was formed on 20th March 2002 for the benefit of companies involved in Supplying, Designing, Testing and Manufacturing EMC products. Networking lunches are held 3 times a year. The current President is Paul Duxbury, CST UK Ltd. The EMCIA Secretariat is Nutwood UK Ltd. To find out more go to page 38.

Passive & Electromechanical Components

- Free software tools for engineers on www.we-online.com/toolbox
- Reference designs with the manufacturer of switching regulator IC's
- Design kits with life time refill
- Samples free of charge, usually within 48 hours
- Small quantities: We can deliver upon request our technology leading components direct from stock to assist with pre production runs
- Worldwide technical sales force: We are present worldwide to support you in finding solutions
- Application guide "Trilogy of Magnetics" and "Trilogy of Connectors"

When Good Enough Is Not Good Enough

It's a tough, competitive world. If you let your guard down for a second, your competition could knock you out of the game. So you've got to keep finding ways to get better, faster, more accurate. That's the way we think at AR, and that's why our customers welcome our new products and new technologies. We can help you gain a competitive edge with innovations like the following:

MultiStar Precision DSP Receiver

This EMI receiver accurately performs over 30,000 CISPR detections at once to reduce test time from days to minutes and insures that you detect short duration disturbances!

MultiStar Multi-Tone Tester

This incredible system cuts RF immunity testing from days down to hours by testing multiple frequencies simultaneously. It saves time & money, and helps get your product to market faster.

1.0 to 2.5 GHz Solid State Amplifiers

This amplifier family provides an alternative to TWTA's and offers better harmonics, less noise and superior reliability.

Dual Band Amplifiers

For the first time you can go from 0.7 to 18 GHz with the reliability of solid state. You not only have new freedom, you've got a two-amp package that costs less, weighs less, and takes up less space than two separate amplifiers.

Traveling Wave Tube Amplifiers

We may not have invented TWTA's, but we definitely perfected them. Our extensive line of TWTA's provide higher power up to 40 GHz. Reliable power, compact size. We offer CW or pulse designs.

Integrated Test Systems

AR can provide an all-in-one test system for any EMC application from DC to 50 GHz. Everything you need is right at your fingertips. Our systems make testing easy, accurate, efficient and affordable.

Laser-Powered E-Field Probes

Never needs batteries. Most continuous coverage from 5 kHz to 60 GHz and up to 1000 V/m field strength. With outstanding accuracy, linearity and bandwidth.

Radiant Arrow Bent Element Antennas

We bent the rules and advanced the science of log periodic antennas. Our bent element antennas are up to 75% smaller, lighter, and more compact to fit in smaller chambers.

EMC & Compliance Companies

3C Test Ltd
Silverstone Technology Park
Silverstone Circuit, Northants
NN12 8GX
Tel: +44 (0)1327 857500
Email: sales@3ctest.co.uk
Web: www.3ctest.co.uk

3C Test is a UKAS accredited EMC Test facility based at Silverstone Circuit in Northamptonshire, providing test facilities for commercial, IT, military, medical and automotive EMC testing. Approved by UKAS, FCC, VCCI, Industry Canada and Ford. 3C Test is appointed as a VCA Technical Service for the e marking of automotive sub-assemblies & full vehicles. The custom built Silverstone site houses 4 Semi-anechoic chambers, including a CISPR 16 / ANSI C63.4 compliant 10m chamber, a 3m CISPR 16 / ANSI C63.4 chamber and two CISPR 25 / ISO 11452 chambers. The facility also boasts a general-purpose screened room, four dedicated automotive transient (ISO 7637) laboratories and a high voltage mains immunity/ESD laboratory.

ACB (American Certification Body) Europe
2 Green Park Close, Winchester
Hants SO23 7HG
Tel: +44 (0)7939 880829
Email: sales.eu@acbcert.com
Web: www.acbcert.com

ACB is a TCB for the FCC, CB for Industry Canada, RCB for Japan and a Notified Body for the R&TTE and EMC Directives, providing certification services for test labs and equipment manufacturers. A global company with a large department of experienced engineers, we offer a high quality service dealing with state of the art products, quickly and efficiently. We offer Certification for Energy Star and a range of International Approvals compliance services.

We provide training courses and material on radio testing and

certification for industry groups or bespoke to suit your needs.

A.C. Technology Systems Ltd
Hill House, Portuan Road
West Looe, Cornwall PL13 2DN
Tel: +44 (0)1285 657756
Fax: +44 (0)1285 652362
Email: info@actechsystems.co.uk
Web: www.actechsystems.co.uk

A.C. Technology Systems Ltd specialises in the design, development and supply of modules and systems associated with the protection of equipment and structures from the effects of both radiated and conducted electromagnetic interference.

Advanced Monolithic Ceramics
Whispers, Station Approach
Four Marks, Hants GU34 5HN
Tel: +44 (0)1420 561496
Fax: +44 (0)1420 561496
Email: mpye@johansondielectrics.com
Web: www.amccaps.com

AMC, an ISO 9001 and MIL approved company, manufacture ceramic EMI Filters including Planar arrays, discoidals, feedthroughs and stacked Switch-Mode capacitors. We offer maximum flexibility, high quality products and application specific solutions.

AEF Solutions
A division of Esprit Electronics Ltd
Unit 46 Thomas Way
Lakesview International
Business Park, Hersden
Canterbury, Kent CT3 4JJ
Tel: +44 (0)1227 711455
Fax: +44 (0)23 8045 5022
Email: paull@aefolutions.com
Web: www.aefolutions.com

AEF Solutions provide Electronic Filters for EMC, EMI, RFI, ESD and

Transient Voltage Suppression (TVS) including lightning protection. For commercial or military applications, these products can be provided within standard connector shells or in the form of discreet modules.

Distributors:
Esprit Electronics
Germany - EMCA
Italy - SPEC TEC
Scandinavia - Expando
Spain - S.C.P.
USA - Accorde Distribution

Member of **emcia**

Aerco Limited
Unit 16/17 Lawson Hunt Ind. Est.
Broadbridge Heath, Horsham
West Sussex RH12 3JR
Tel: +44 (0)1403 260206
Fax: +44 (0)1403 259760
Email: sales@aerco.co.uk
Web: www.aerco.co.uk

Aerco is a leading global stockist and distributor of electrical components, supplying manufacturers and service companies in the aerospace, military, medical, transportation and industrial markets with products such as filters, electrical switches and electrical connectors.

Agilent Technologies UK Ltd
610 Wharfedale Road
IQ Winnersh, Wokingham
Berks RG41 5TP
Tel: +44 (0)118 927 6201
Fax: +44 (0)118 927 6855
Email: contactcenter_uk@agilent.com
Web: www.agilent.com

Agilent Technologies provides signal analysis for EMI pre-compliance and compliance testing. If you are creating new labs or enhancing existing facilities, Agilent solution partners can provide turnkey solutions - including equipment, accessories, training, installation and support - all through a single point of contact.

The new MXE EMI receiver is not only CISPR-compliant, but exceeds

regulatory requirements. The built-in EMC measurement application provides multiple signal traces, measurement list manipulation, real time detectors, and a strip-chart display to evaluate signal trends over time. The MXE is also an X-Series signal analyzer, enabling closer examination of signal details with tools such as span zoom, zone span and spectrogram displays so EMI test engineers and consultants can deliver new insights about the products they test.

The identical EMC measurement application is also available for any X-Series signal analyzer, enabling quick informative EMI pre-compliance measurements during product development.

Alrad Instruments Ltd
Turnpike Road Industrial Estate
Newbury, Berks RG14 2NS
Tel: +44 (0)1635 30345
Fax: +44 (0)1635 32630
Email: electronics@alrad.co.uk
Web: www.alrad.co.uk

ALRAD ELECTRONICS is one of the UK's foremost high voltage product distributors. We sell a very wide range of high stability, low ripple high voltage power supplies, high stability current monitors offering high accuracy of +1%, -0% and fast rise time and variable pulse width industrial pulse generators.

API Technologies
 c/o Spectrum Control GmbH
 Hansastrasse 6
 D-91126 Schwabach, Germany
 Tel: +49 9122 795 0
 Fax: +49 9122 795 58
 Email: heiko.zimmermann@apitech.com
 Web: www.apitech.com

API Technologies Corp. (NASDAQ: ATNY) is a leading technology provider of RF/microwave, microelectronics, and security technologies for critical and high-reliability applications, including aerospace, defense, industrial, medical, energy, and communications. The company's international customers include leading Fortune 500 firms, as well as the governments of the U.S., Canada, the United Kingdom, NATO and the European Union.

UK Distributors:

Midas Components
 Richardson Electronics
 TTI

Applied Coating Technologies
 Tipton Road, Tividale
 Oldbury, West Midlands B69 3HY
 Tel: +44 (0)121 557 5324
 Fax: +44 (0)121 557 7064
 Email: info@appliccoat.com
 Web: www.appliccoat.com

ACT specialises in the application of conductive coatings for EMI shielding. Coatings are applied by manual or robotic spraying techniques and include nickel, copper and silver loaded paints. ACT is accredited to ISO9001:2008.

AQL EMC Ltd
 16 Cobham Road, Ferndown
 Industrial Estate, Wimborne,
 Dorset BH21 7PG
 Tel: +44 (0)1202 861175
 Fax: +44 (0)1202 861176
 Email: info@aqlmc.co.uk
 Web: www.aqlmc.co.uk

UKAS Accredited Test House for Defence (7 test chambers), Aerospace & Marine sectors. RS103 to 40GHz, RS105, EMP, HIRF, HERO, Reverb/Mode Stirred Chamber & Lightning. Power Quality On-site and Mobile DC-

850Hz@40kVA. Portable HIRF up to 25kV/m. Design, Consultancy & Rectification provided during tests. Worldwide Off site testing. The complete EMC Test Service.

AR UK
 Unit 8, Madingley Court
 Chippenham Drive, Kingston
 Milton Keynes, Bucks MK10 0AE
 Tel: +44 (0)1908 282766
 Fax: +44 (0)1908 288249
 Email: arukinfo@arworld.co.uk
 Web: www.arukltd.co.uk

AR UK Ltd specialise in the supply of test instrumentation and turnkey systems for RF & Microwave, EMC, Electrical Safety (LVD), and Power Electronics applications. Our diverse range of products combined with our experience and technical competence means we are able to provide our customers with a total system solution. We offer full UK based technical support, installation, service and training.

 Fax: +44 (0)1772 855262
 Email: damian.austin@baesystems.com
 Web: www.baesystems.com

BAE Systems, Engineering Integrated Solutions provide an Electromagnetics Design, Test, Certification & Consultancy services from equipment level to full platform across both military and civilian products. With over 50 years in the EM market our capabilities provide support to all phases of a products lifecycle from Feasibility through design and production and into in service support.

BAE SYSTEMS
 Faraday Test Centre,
 Airport Works, Rochester, Kent
 ME1 2XX
 Tel: +44 (0)1634 204457
 Fax: +44 (0)1634 203647
 Email: paul.j.davison@baesystems.com
 Web: www.baesystems.com/faradaytest
 centre

The Faraday Test Centre offers a wide range of UKAS accredited EMC and Environmental test facilities all housed in one modern building at BAE SYSTEMS, Rochester, Kent. The experienced staff can help you through your commercial or military test programmes from generation of test procedures through development to full certification testing.

Barton Engineering & Export Ltd
 Pressmetal House
 St Augustine's Business Park
 Estuary Close, Whitstable
 Kent CT5 2QJ
 Tel: +44 (0)1227 793796
 Fax: +44 (0)1227 793464
 Email: info@bartoneng.co.uk
 Web: www.bartoneng.co.uk

Manufacturers of shielded enclosures, data protection rooms and secure environmental rooms. Also manufacturers of the Barton range of EMC and High Attenuation server racks. 19" standard, 12 units to 42 units, tested to SDIP29.

C. Brandauer & Co Ltd
 235 Bridge Street West
 Birmingham B19 2YU
 Tel: +44 (0)121 359 2822
 Fax: +44 (0)121 359 2836
 Email: rcrozier@brandauer.co.uk
 Web: www.brandauer.co.uk

Brandauer have a world-class reputation for precision stamping and offer EMC Shielding services including manufacture of finger strips, screening cans, connector gaskets and earthing clips to meet various shielding applications.

Cabletec ICS Ltd
 Sunnyside Road
 Weston Super Mare, Somerset
 BS23 3PZ
 Tel: +44 (0)1934 424900
 Fax: +44 (0)1934 636632
 Email: sales@cabletec.com
 Web: www.cabletec.com

Cabletec is a leading manufacturer of high performance metal braided screening products including EMC screening braids for effective screening of wire assemblies, market approved earth bonding leads and EMC over-braiding of conduit and cables.

Cherry Clough Consultants Ltd
 9 Bracken View, Brocton
 Stafford, ST17 0TF
 Tel: +44 (0)1785 660247
 Fax: +44 (0)1785 660247
 Email:
 keith.armstrong@cherryclough.com
 Web: www.cherryclough.com

Proven techniques save time and money and reduce financial risks, whilst achieving EMC compliance for products, systems, and installations. Pragmatic approach to Self-Certification and Technical Construction Files. Sensible QA procedures and low-cost testing to maintain compliance in production. EMC design reviews.

CST UK Ltd:
 Strelley Hall, Main Street, Strelley
 Nottingham NG8 6PE
 Tel: +44 (0)115 9061 120
 Fax: +44 (0)115 9061 115
 Email: info@uk.cst.com

CST develops and markets high performance software for the simulation of electromagnetic fields in all frequency bands. Its success is based on the implementation of leading edge technology in a user-friendly interface. CST's customers are market leaders in industries as diverse as Telecommunications, Defense, Automotive, Electronics,

and Medical Equipment. Today CST employs 200 sales, development, and support personnel, and enjoys a leading position in the high frequency 3D EM simulation market.

CST STUDIO SUITE™ provides powerful simulation technology ideally suited to EMC analysis, including coupled simulations which allow for large system analysis and installed performance studies. Many years of in house expertise support the tools and give customers confidence in simulation results. d of experimentation.

Dexter Magnetic Technologies Europe Ltd is a specialised Global Electronic Component distributor in ferrite core solutions for current and evolving types of EMC and power applications.

The group has a long and well established relationship with the Fair-Rite Products Corp, USA organisation a leading innovator and manufacturer of quality engineered ferrite products for the most demanding applications.

Fair-Rite Products Corp, offers a very comprehensive lien up of ferrite components in a wide range of materials and geometries for EMI Suppression, Power Applications and RFID Antennas.

The Dexter group carries a market leading range of products readily available from our UK operations and NA warehouse facility, giving you immediate access to a very wide range of material grades suitable for your application needs.

Dexter's dedicated and focused business is well aligned to support your future demand for Ferrite component solutions working with technology leaders including, Fair-Rite Products Corp, TDK-EPC Corporation, Magnetics Inc, Ferronics Inc & Toshiba-Japan. We welcome the opportunity of being your preferred partner.

**If you are serious about selling EMC products or services to Industry...
then you should be a Member.**

The EMCIA was formed on 20th March 2002 for the benefit of companies involved in Supplying, Designing, Testing and Manufacturing EMC products. Networking lunches are held 3 times a year. The current President is Alan Warner.

Excellent EMC Books

EMC Design Techniques for electronic engineers Author: Keith Armstrong C.Eng FIET SMIEEE ACGI BSc (Hons)

Cost £55 plus p&p. ISBN 978-9555118-4-4

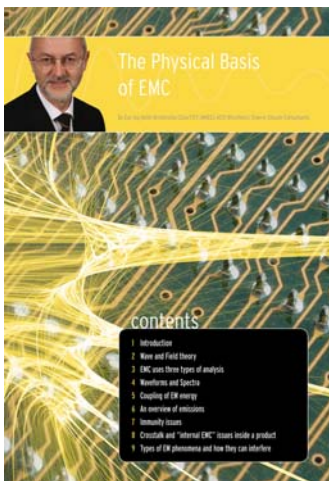

Contents:
Introduction;
The Physical basis of EMC;
Circuit design and choice of components for EMC;
Cables and connectors;
Filters and transient suppressors;
Shielding (Screening);
Printed Circuit Boards (PCBs);
Electrostatic discharge (ESD);
Electromechanical devices and spark ignition;
Power factor correction (emissions of mains harmonic currents);
Emissions of voltage fluctuations and flicker;

Immunity to power quality issues;
EMC techniques for heatsinks.

The Physical Basis of EMC Author: Keith Armstrong C.Eng FIET SMIEEE ACGI BSc (Hons)

Cost £25 plus p&p. ISBN 978-0-9555118-3-7

Contents:
Introduction;
Wave and Field theory;
EMC uses three types of analysis;
Waveforms and Spectra;
Coupling of EM energy;
An overview of emissions;
Immunity issues;
Crosstalk and “internal EMC” issues inside a product;
Types of EM phenomena and how they can interfere.

EMC for Printed Circuit Boards Author: Keith Armstrong C.Eng FIET SMIEEE ACGI BSc (Hons)

Cost £47.00 plus p&p. ISBN 978-0-9555118-5-1

More than just a book. It is a true learning aid. Graphics in full colour. Designed to lay flat for easy learning. Written in a clear concise no nonsense style. Destined to become the Standard for EMC PCB Design. 168 A4 pages.

This book is about good-practice EMC design techniques for printed circuit board (PCB) design and layout. It is intended for the designers of any electronic circuits that are to be constructed on PCBs, and of course for the PCB designers themselves. All applications areas are covered, from household appliances, commercial and industrial equipment, through automotive to aerospace and military.

This is a book for electronic and PCB engineers who need to employ good EMC and SI techniques to save time and money when designing with the latest technologies, to make reliable and compliant products.

The book uses very little maths and does not go into great detail about *why* these techniques work. But they are well-proven in practice by successful designers world-wide, and the reasons they work are understood by academics, so they can be used with confidence. Numerous references lead to detailed explanations and mathematical foundations.

It is difficult for textbooks to keep up to date with fast-changing PCB technology and EMC techniques, which is why most of the references are recent conference papers and articles available via the Internet.

EMC for Product Designers Fourth Edition Author: Tim Williams

Cost £47.99 plus p&p. ISBN 978-0-75-068170-4

This book is almost certainly regarded as the bible on EMC Design across all International borders.

Brilliantly written and extremely informative, it is divided into three parts, Legislation & Standards, Testing and Design plus a number of interesting and useful Appendices.

Every EMC product designer should buy this latest edition.

Notes

The Centre of Excellence

CISPR 16 Chamber, number 1 of 2

Indoor OATS

Client meeting room

Military Chamber, number 1 of 3

Since Hursley EMC was formed over 15 years ago in a management buyout from IBM, we have continued to improve our service and facilities to our customers.

Investing in state of the art technology, equipment and staff we have steadily increased our test laboratory facilities over those years.

However there came a point when we recognised that we could only increase our capacity by increasing the size of our premises.

After months of researching suitable locations, we eventually found the ideal site a 10,000 sq foot building just around the corner from our Brickfield Lane site at Chandlers Ford.

After many months of work we are now fully operational in our new headquarters, whilst retaining our OATS chamber at Hursley near Winchester.

Visit our website for more information or better still, visit us and view our new facilities.

CST STUDIO SUITE 2013

Make the Connection...

Find the simple way through complex EM systems

www.cst.com/emc

Components don't exist in electromagnetic isolation. They influence their neighbors' performance. They are affected by the enclosure or structure around them. They are susceptible to outside influences. With System Assembly and Modeling, CST STUDIO SUITE helps optimize component and system performance.

Get the big picture of what's really going on. Ensure your product and components perform in the toughest of environments.

Choose CST STUDIO SUITE –
Complete Technology for 3D EM.
